

Why Recycle Organics?

All American Waste provides each of its customers with a customized approach to their waste and recycling needs. Organics recycling provides another opportunity for our customers to reduce waste and increase their recycling rates. All American Waste is the experienced partner, having implemented food scraps and organics recycling programs for customers of all sizes and types.

Connecticut Legislation Effective January 2014:

- Requires entities that generate an average of at least 104 tons of organic material per year to (1) separate the organic material from other solid waste (2) recycle the organic materials at a permitted compost facility within 20 miles of the generation site.
- And, as of January 1, 2020, extends to all entities that generate an average of 52 tons per year.

All American Waste will help you comply with Connecticut's organic recycling regulations.
